- Then roll it using rolling-pin to a round shape. Cut it into half using knife. now you take a semi-circle pieces, using your finger tips, apply water on the straight edges of the pastry and make a fold in the shape of triangle as shown in the below picture and seal along the fold like cone shape.
- Place the stuffing inside the cone, using fingertips, wet the circumference of the cone with water. Press both the edges together. Make sure there are no opening. Repeat the same process for the rest of the dough.

 - If you have amchur powder (dry mango powder), you can avoid lemon juice.
 - If you have leftover dough, then make papdi out of it.
- Sometimes bubbles will appear, this may be due to high temperature of oil or softness of the dough.
